

**List task/milestone accomplished by the team this week:**

- Modified github's README with test user and administer.
- Implement some functions for administer account: login as administer, add a administer dashboard page, can list all user accounts and allow to delete user.
- Save notes into the database for study mode.

**Provide instructions for expert users to verify your finished work:**

- View GitHub commits ([Link](#))
- Follow the instruction to setup our project ([Link](#))
- Login the admin account and check the status.
- Login the user account to check the study mode.
