Team	Feedback	Response
Deepcourse	1. Lists all password and/or username requirements for registration	Great advice for listing the requirements of registration, we will work on it. (Already have it)
Deepcourse	2. The Sign up will pop back to Login if there is an error	As for "The Sign up will pop back to Login if there is an error", that's because we are using one html to contain both sign up and login, it's a flip CSS to show both of them. (Already fix it)
Deepcourse	3. Make sure correct answer is provided in the quiz	We updated the database to fix the options of the question that partner team pointed out.
Deepcourse	4. Make sure the scoring after quiz is available	We are still working on the quiz result part (Now that the score part is completed)
Librarians	5. See a more detailed Testing Plan.	The testing plan has been updated with details
Codescapes	6. make sure your files in weekly_team_presentation and weekly_team_report are formatted the same - ex. week1, week2, week3	We have modified
Codescapes	7. tell users to change into dev folder before running main.py or change command to python dev/main.py	Already added to README
Gladiators	8. I was able to create an account, but when I click on Start under Choose a Language and mode, it is taking me to another page with index error	We have fixed this problem
Deepcourse	9. Ask users to repeat passwords during the sign up	Already have it
Deepcourse	10. Make sure the footer sticks to the	Already fix it

	bottom of the page	
Deepcourse	11. Need an button to go to admin dashboard for admin account	We have added
