Team	Feedback	Reason
Librarians	1. Stuff like changing the font size, font color, background color can allow a bigger varieties of users to use the website.	This would require a significant increase in workload, so we will not be adding
Codescapes	2. create an about us page - cool seeing team members, but it takes up more than half the main page	We think that the page is for the introduction so take up more area does not affect much
ThriveToday	3. Possible light mode? Or easier to read colors	May not have time to implement a light mode
Professor	4. Automatic log out if idle too long	This would require a significant increase in workload, so we will not be adding
